

GETTING A COVER FOR YOUR NEW GADGET? HOW ABOUT A RADIATION COVER FOR YOURSELF?

From

Mobile Phones

Computers

Tablet PC's

Wi-Fi Routers

Did you know?

The electromagnetic field in your home could result in sleeplessness or restless night.

When you have less number of signal bars on your phone it emits more radiation.

Cell phone manuals ask you to...

- Keep the device away from your body
- Text more than talk
- Recommend that talk time should not exceed 6 mins/hour.

Cell phones draw more power, and emit more radiation, in enclosed metal spaces like elevators, cars, trains and planes.

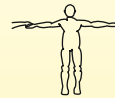

Envirochip A Well Researched, Tested and Certified Product from Synergy Environics Limited

SOME FACTS ABOUT ENVIROCHIP

- Neutralizes the harmful effects of radiation emanating from Mobile Phones, Laptops, Tablet PC's and Wi-Fi Routers and reduces the stress levels of people subjected to radiation from such devices.
- CE Certified and has been tested extensively by DB Technology Labs, UK and Max Healthcare in India for its effectiveness and usability.
- Continues to work until it remains fixed on a device.
- Made from a patented technology using a combination of inert materials.

HOW DO I KNOW IT WORKS? TRY A SIMPLE HAND STRENGTH TEST

- Lift your hand and clench your fists. Ask someone to push one of your hands down with force while you try and resist it. You will notice that the hand does not go down easily.

- Now hold your mobile phone (switched on) in one hand and ask your friend to push your other hand down with the same force while you resist. Did you notice any change? You will probably find that your hand goes down easily.

- Now fix **Envirochip** on your mobile phone & repeat the exercise. You will notice that you are able to resist the force just like in the 1st case.

Syenergy Environics Limited has a strong history of more than 25 years of radiation management in buildings across India and overseas
